## Preface

Dear Colleagues!

Present proceedings were published to summarize the results of the XXI International Open Conference "Modern informatization problems in economics and safety". The conference was held through the joint efforts of Science Book Publishing House (USA), Baku State University (Azerbaijan), Vologda State University, Lipetsk State Technical University, Don State Technical University (Rostov-on-Don), and the Academy of Federal Security Guard Service of the Russian Federation (Orel), in November 2015 – January 2016.

Proceedings contain information within the following areas: information systems and their applications, information systems in economics.

The conference was held to encourage exchange of experience between leading experts in utilization of information technologies in various spheres of science, engineering, and education. The conference followed the traditions established by its predecessors.

Representatives of leading research centers and educational institutions from some countries introduced the audience to the results of their research, which are available not only in this collected works, but on <http://www.sbook.ru/spi>.

Organizing Committee Chair,  
Editor in Chief  
Dr. Sci., Prof.

O.Ja. Kravets
