Proceedings summarizing the results of the XXVII-th International Open Science Conference "Modern informatization problems in economics and safety" (MIP-2022'ES), held in November 2021 - January 2022. It contains information within the following areas: **information systems and their applications, information systems in economics.**

Data gathered within collected papers may be useful to researchers and engineering technicians, whose work involves various aspects of modern society informatization, as well as to postgraduates and students studying subjects related to informatics and computer engineering.

## Preface

Dear Colleagues!

Present proceedings were published to summarize the results of the XXVII International Open Conference "Modern informatization problems in economics and safety" (MIP-2022'ES). The conference was held through the joint efforts of Science Book Publishing House (USA), Baku State University (Azerbaijan), Vologda State University, Lipetsk State Technical University, Don State Technical University (Rostov-on-Don), and the Academy of Federal Security Guard Service of the Russian Federation (Orel), in November 2021 – January 2022.

Proceedings contain information within the following areas: information systems and their applications, information systems in economics.

The conference was held to encourage exchange of experience between leading experts in utilization of information technologies in various spheres of science, engineering, and education. The conference followed the traditions established by its predecessors.

Representatives of leading research centers and educational institutions from some countries introduced the audience to the results of their research, which are available not only in this collected works, but on <http://www.sbook.ru/spi>.

Organizing Committee Chair,  
Editor in Chief  
Dr. Sci., Prof.

O.Ja. Kravets

**Contents**

Preface.....	3
Almusawi O.A.R., Kravets O.Ja. Improving the elasticity and reliability of cloud resources using a transactional approach .....	4
Azeez A.E. Research on designing and optimizing the reliability of transaction processing in a service-oriented DBMS.....	20
Bykanov S.V., Latypova R.I. Intellectual customs: problems and prospects .....	40
Dodonova E.A., Ivaschenko A.V., Sitnikov P.V., Surnin O.L. Digital transformation of service delivery processes on the basis of enterprise content management (ECM) platform .....	46
Kustov A.I., Sklyarov V.A. Information technologies as an effective tool for implementing business processes in conditions of limited mobility of personnel.....	50
Kutsakina D.A. Analysis of existing approaches to building information systems for remote patient monitoring systems.....	55
Lomakina L.S., Molchanov M.N. Refactoring as a software quality improvement tool.....	58
Lvovich Ya.E., Preobrazhenskiy A.P. The analysis of the characteristics of medical information systems .....	63
Mironov O.Y., Kutsakin M.A., Prokopenkov V.I., Eliseev M.A. On the use of Big Data in cloud computing technologies.....	67
Polunin A.A. Solving the problem of organizing software interaction by using the microservices architecture.....	72
Ryndin N.A. Optimization of the developing digital management environment based on the principles of multivariate structuring.....	75
Senkiv D.A. Overview of reliability indicators of information security in computer systems on the example of monitoring.....	81
Statnikov I.N., Firsov G.I. On one decision-making technology in the numerical study of mathematical models of engineered human-machine systems .....	85
Vitkalov K.A., Danilov A.D. Analysis of methods for qualitative and quantitative assessment of safety engineering .....	90
Author's index .....	97
